Menolipsis in association with *Pingxiao* tablets

Zhou Yan, Zhaofu (Department of Obstetrics and Gynecology, Beijing Tiantan Hospital, Beijing 100050)

Keywords: Menolipsis;停经

Patients aged 37 years. In 2003, they were found to have uterine blood clots. After surgery, they were treated with *Pingxiao* tablets (25 mg, 1 tablet daily). Over 3 months, the symptoms improved. In 2005, they were given 2 tablets daily for 4 days, then 3 tablets daily. After 1 month, their symptoms had improved. In 2007, they were given 4 tablets daily for 3 days. After 2 months, their symptoms had improved. In 2007, they were given 4 tablets daily for 3 days. After 2 months, their symptoms had improved.

Discussion: *Pingxiao* tablets, a traditional Chinese medicine, contain *Taraxacum officinale* and *Silybum marianum*. These herbs are commonly used to treat hepatic dysfunction, dyslipidemia, and obesity. They are known to have anti-inflammatory and antioxidant effects. The efficacy of *Pingxiao* tablets for improving Menolipsis symptoms has been reported in previous studies.
